

AT 10-01

- Single Phase Generator Management -

In conjunction with **Heinzmann®** electronic speed governors the AT 10-01 provides the following functions:

Synchronizing & Isochronous Load Sharing in island operation mode in one unit

TECHNICAL INFORMATION

Indications:	BUS voltage	LED, green
	GEN. voltage	LED, green
	IN PHASE	LED, yellow
	REVERSE POWER	LED, red
	GEN BREAKER closed	LED, yellow
Adjustments:	SYNCH. GAIN	potentiometer
	LOAD GAIN	potentiometer for scaling of nominal load
Output Signal to GCB:		Single pulse
Voltage Inputs:		231 V AC \pm 15%, 50/60 Hz
	or:	115 V AC \pm 15%, 50/60 Hz
Current Input:		0 ... 5 A max. 2 VA – standard –
	or:	0 ... 1 A max. 2 VA – optional –
Power Supply:		231 / 115 V AC \pm 15%, 50/60 Hz
Temperature Range:		-40° C ... +70° C
Protection Grade:		IP 00
